### EXAMINER'S AMENDMENT

1. This Examiner's Amendment/Allowance is in response to the "Affirmed-In-Part" BPAI Decision on 4/30/09. The rejections of claims 1-25 were reversed, while the rejection of claim 26 was affirmed. As a result of claim 26 being affirmed, the claim is cancelled via this Examiner's Amendment.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

**Cancel claim 26.**

4. The following is an examiner's statement of reasons for allowance:

As to independent claims 1, 13, and 25 and as shown in the BPAI Decision on 4/30/09: Sinibaldi (US 6,549,945) discloses a digital signal processor (DSP) based communications adapter card (col. 2, lines 26-27).

Sinibaldi discloses "[a]n example of a metric used for processing load is MIPS which represents the number of millions of instructions per second that are required by a processing operation" (col. 17, lines 41-43).

Sinibaldi discloses that the DSP contains "a Matrix...that contains the list of functions or tasks and associated MIP requirements" (col. 18, lines 25-27).

Applicant acknowledges that “[e]xecuting various program tasks at different priority levels was indeed well known at the time of the invention” (App. Br. 7).

Blevins (Us 6,445,963) discloses an integrated advanced control blocks in process control systems (see Abstract).

5. However, the invention as claimed using a “multivariable linear program” when taken in the context of the claims as a whole, was not uncovered in the prior art teaching.
6. Nor were references uncovered that would have provided a basis of evidence for asserting a motivation that one of ordinary skill in the art at the time the invention was made, knowing of a method, control processor, and computer containing the above mentioned features would have integrated or modified to teach the method, control processor, and computer to utilize a multivariable linear program.
7. Dependent claims are allowed as they depend upon allowable independent claims.
8. Any comments considered necessary by Applicant must be submitted not later than the payment of the issue and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement for Reasons for Allowance.”
